Re: Regulation Docket. No. 56 – Pre-filed Comments of Gary Myers for Dec. 5, 2019 PSC Meeting In Response to Exec. Director's Directive to DNREC Dated November 21, 2019

Dear Chair and Commissioners:

I concur with the Comments of Gary Myers, and share his concerns. As discussed in prior comments on Reg. 56, it is likely the Cost Cap was exceeded as early as 2012, based on Cost Cap legislation passed in 2010. DNREC has continuously manipulated the administrative process to delay a freeze. Their continued obstruction by failure to provide Cost Cap Calculations for PSC consideration is a blatant attempt to defeat the legislative intent. Ratepayers have been waiting for relief for seven years, a period comparable to Biblical famines. A Just and Reasonable solution for the Commission would be to pass a temporary freeze until DNREC complies with the law, and I petition the Commissioners to adopt a temporary freeze.
